SUBJECT INDEX

Abdomen, 223–225
Abdominal computed tomography, 237–239
Abdominal cryptococcoma in AIDS, 237–239
Abdominal masses, 237–239
Abscess, 42–44; 68–74; 150–153
  psoas, 79–80
Accessory cardiac bronchus, 144–146
Acquired immunodeficiency syndrome, 237–239
Acute alcoholic myopathy, 161–164
Adenocarcinoma of the colon, 199–202
Adenopathy, 68–74
Adrenal glands
  hyperplasia, 240–244
  in infants and children, 240–244
Aggressive angiomyxoma, 32–35
Air-fluid level, 150–153
Alcoholism, 161–164
Anemia, 116–121
Aneurysm, 81–85
Angiography, 100–107
Angiomyxoma, 32–35
Anomalies, congenital, 174–181
Aortic dissection, 140–143
Aortopulmonary window, 57–60
Appendicitis, 208–210
Arteriovenous malformation, 111–115
Aspergilloma, cavity-in-cavity
  appearance, 64–67
Axillary vein simulating abscess, 150–153

Blunt chest trauma, 270–281
Bones, 19–24
  neoplasms, 19–24
Bony pelvis, metastases in, 203–207
Brain, 61–63
  cysts, 174–181
Bronchial anomalies, 144–146
Bronchus, cardiac, 144–146

Cadaveric sternoclavicular joint, high resolution
    computed tomography of, 13–18
Calcification, metastates, diaphragm, muscle, spleen,
    282–286
Calcified liver metastases, 196–198
Calcified metastases to skeletal muscle, 199–202
Calvarial eosinophilic granuloma, magnetic resonance
    imaging of, 251–252
Carcinoid tumor with intradural spinal metastases,
    258–260
Carcinoma
  pancreatic, 138–139
  squamous cell, 138–139
Cardiac bronchus, 144–146
Cardiac failure, 135–137
Cerebral metastases, 182–186
Cervical aneurysms, 81–85
Cervix, 154–158
Child adrenal glands, 240–244
Cholecystitis, acute postoperative, 29–31
Chondrosarcoma of the larynx, 292–294
Clinical and radiologic staging of locally advanced and
    inoperable bladder carcinoma, 298–312
Colon, adenocarcinoma of, 199–202
Computed tomography in histiocytosis X of the temporal
    bone, 9–12
Contrast media, 150–153
Cortical dysplasia, 61–63
Cryptococcosis, 237–239
Cysts, 220–222

Daughter nodules, 129–134
Degenerative joint disease, 13–18
Developmental cyst, solitary neurofibroma masquerading
    as, 57–60
Diagnosis, 19–24
  of anemia on computed tomography, 116–121
  of epiphrenic esophageal diverticulum, 25–28
  of psoas abscess, 79–80
Diaphragm, 223–225
Dilated biliary ducts, 36–41
Dissecting aneurysm, 140–143
Duodenum, 32–35
Dural invasion, 100–107
Dysplasia, 61–63

Ependymoma, 108–110
Esophagotracheal fistula, 230–236
Esophagus, 226–229
  computed tomography of, 25–28
  diverticula, 25–28
Evaluation of skeletal metastases, 19–24
Extracranial cervical aneurysms, 81–85

Fat collections, 223–225
Fibroadipose polyp, 226–229
Focal cortical dysplasia, 61–63
Foramen magnum tumors, 261–263

Gallbladder, 29–31
Gangrenous acute postoperative acalculous cholecystitis,
    29–31
Gastrointestinal carcinoids, 258–260
Gastrointestinal communication, 32–35
Giant fibroadipose polyp, 226–229
Glioma, 100–107
  with dural invasion, 100–107
Gliomatosis cerebri, 253–257
Glomerulonephritis, 147–149
Granuloma, magnetic resonance imaging of calvarial
    eosinophilic, 251–252

Hamartoma, 61–63
Heart
  disease, 267–269
  magnetic resonance studies, 267–269
  neoplasms, 267–269
Hemangioma, 135–137
Hematomas, intermesenteric, 122–128
Hemomediastinum, 230–236
Hemorrhage in a pituitary adenoma, 187–189
Hepatic artery, iodized oil infusion into, 129–134
Hepatic lobar attenuation difference, 208–210
Hepatocellular carcinoma, 129–134
Hernia, Richter's, 42–44
Histiocytosis, 251–252
Histiocytosis X of the temporal bone, computed tomography in, 9–12
Hyperdense pelvic and inguinal lymph nodes, 45–48
Hyperplasia, 240–244

Infants and children, 240–244
Infarction, 54–56
Infection, 29–31
Inguinal lymph nodes, 45–48
Inoperable bladder carcinoma, 298–312
Interatrial septum, lipomatous hypertrophy of, 267–269
Intermesenteric hematoma, 122–128
Intracranial resection of pituitary adenoma, tension pneumocephalus after, 86–89
Intraspinal carcinoid, 258–260
Intrathecal enhanced computed tomography, 1–8
Intravenous drug abuse, 79–80
Iodized oil infusion, detection of small daughter nodules in hepatocellular carcinoma after, 129–134

Larynx, 292–294
Lateral ventrical, neuroepithelial cysts in, 174–181
Leukemia, 211–215
Leukoencephalopathy, 171–173
Lipid abnormalities, 287–291
Lipiodol, 129–134
Lipoma, 54–56
Lipomatous hypertrophy, 267–269
Liver, 135–137
  computed tomography, 208–210
  hemangioma of, 135–137
  metastases, 196–198
  ultrasound, 208–210
Lobar attenuation alteration, 208–210
Lymphadenopathy, 237–239
Lymphangiography, 298–312
Lymphoma
  renal sinus, 190–192
  uterine cervix, 154–158
Lymph nodes, 45–48

Macrodactyly, 295–297
Macrodystrophia lipomatosa, computed tomography diagnosis of, 295–297
Magnetic resonance imaging, 251–252; 253–257; 287–291
  of calvarial eosinophilic granuloma, 251–252
  of cervical spine, 1–8
Malignant lymphoma, 190–192
Mediastinal adenopathy, 216–219
Mediastinal lipomatosis, 230–236
Mediastinum, 57–60; 220–222; 230–236
  computed tomography, 116–121
Metastases, 19–24; 108–110; 196–198; 298–312
  cerebral, 182–186
  of the colon, 203–207
Metastatic calcification, diffuse, secondary to renal failure, 282–286
Metastatic disease, 216–219
Metastatic malignant melanoma, 182–186
Moyamoya disease, 247–250
Mucoid impaction of bronchi, 165–168
Mucous bronchogram sign, 165–168
Mucous plugging of bronchi, 165–168
Multiform glioblastoma, 253–257
Muscle, 161–164
  disease, 193–195; 199–202
  neoplasms, 199–202
Myonecrosis, 161–164
Myopathy, 161–164
Myositis, 161–164

Neck masses, 81–85
Neonatal hemangioma of the liver, 135–137
Neoplasms, 154–158; 203–207; 220–222; 226–229; 251–252
  colon, 203–207
  periampullary, 36–41
Nephrotic syndrome, 147–149
Neuroblastoma, 240–244
Neuroepithelial cysts, 174–181
Neurofibroma, 57–60
Neurosarcoidosis, 96–99
Neutropenic colitis, 211–215
^{99m}Tc-HM-PAO, 247–250
Noncolloid neuroepithelial cysts, 174–181
Non-Hodgkin's lymphoma, 154–158

Occipital condyle fractures, 261–263
Optic nerve, 96–99
Osteoblastic colon metastases, 203–207
Osteosarcoma, 196–198

Pancreatic carcinoma, 138–139
Parenchymal lung injury in blunt chest trauma, quantitation and pattern of, 270–281
Partial lipodystrophy, 287–291
Pedunculation, 54–56
Pelvis, 154–158
Percutaneous needle biopsy, 138–139
Periampullary neoplasm, 36–41
Pericardial cyst, abutting the aorta, 264–266
Pericardium, 264–266
Periesophageal focal fat collections, 223–225
Pituitary
  adenoma, 187–189
  tumor, 86–89
Pneumocephalus, 86–89
Pneumomediastinum, 230–236
Polyp, fibroadipose, 226–229
Portal vein thrombosis, 208–210
Potential space, 230–236
Presacral mass, 108–110

Prostate, 49–53
  cancer, 49–53
  carcinoma, review of, 49–53
Pseudoaneurysm, 75–78
Psoas abscess, 79–80
Pulmonary aspergilloma, 64–67
Pulmonary hilar adenopathy, 216–219
Pulmonary trauma, 270–281

Renal cell carcinoma, 216–219
Renal failure, 282–286
Renal sinus, 190–192
  malignant lymphoma, 190–192
Renal trauma, 159–160
Renal vein and inferior vena cava thrombosis, 147–149
Rhabdomyolysis, 161–164; 193–195
Richter's hernia, traumatic, diphragmatic, 42–44

Sacroiliitis, 79–80
Secondary ependymoma presenting as a presacral mass, 108–110
Serositis, 68–74
Single photon emission computed tomography, 247–250
Skeletal lesion, 295–297
Skull, 251–252
  base fractures, 261–263
  base tumors, 261–263
Soft tissues, 161–164
SPECT imaging
  compared with computed tomography, 247–250
  of Moyamoya disease, 247–250
Spinal cord, 96–99
Spinal metastases, carcinoid tumor with intradural, 258–260
Squamous cell carcinoma, 138–139
Sternoclavicular joint, 13–18
Stroke, 247–250
Superior gluteal artery, 75–78
Syringomyelia: myelography, computed tomography, and magnetic resonance imaging, 1–8
Systemic lupus erythematosus, 68–74

Temporal bone, histiocytosis X of the, 9–12
Tension pneumocephalus, 86–89
Thoracic aorta, 140–143
Thoracic lipoma, a symptomatic infarcted, 54–56
Thorax, 54–56, 116–121; 223–225
  cysts, 264–266
Thymic cysts, 220–222
Thymus, 220–222
Transcatheter arterial embolization, 129–134
Trauma, 171–173
Traumatic avulsion of the ureter, 159–160
Triple-barreled dissection, 140–143
Tumors, occult occipital condyle fractures presenting as, 261–263
T_2-weighted magnetic resonance imaging, 171–173
Typhlitis, 211–215

Ultrasound, 32–35; 36–41
Ureter, traumatic avulsion of, 159–160
Ureteral trauma, 159–160
Uterine cervix lymphoma, 154–158
Uterine lymphoma, 154–158

Vagus nerve, 57–60
Veins on computed tomography, 150–153
Vena cava thrombosis, 147–149
Venous thrombosis, 147–149
Visual inspection, 45–48

Whipple procedure, 36–41
White matter changes in traumatic leukoencephalopathy, 171–173
Wyburn-Mason syndrome, 111–115
